

## SUBJECT INDEX

This Index replaces the former Quick Reference Key Word Index. This Index provides sub topic listings for the larger categories. For example, generating functions has about 100 sub-listings.

Entries are listed by volume and issue number (page number) using the format **vol #.issue #(page #)** and the page reference is indicated by the **beginning** of the article in which the topic appears. Some topics have several sub categories and can be found under the specific heading. For example, most things relating to Pell such as equations, identities or polynomials are listed under Pell, not under equations, identities or polynomials, respectively. But in some cases appear under other specific headings.

Since the topic "Fibonacci" has an immense number of entries, it seemed prudent to segregate Fibonacci topics. Similarly for Lucas topics. So for the letter "F" all non-Fibonacci topic listings appear first, followed by listings "Fibonacci-A", etc. Similarly for the letter "L" and "Lucas-A", etc. Other topics are listed in a natural way.

Note that this Index is intended to be as complete as possible. However there are bound to be sins of omission, some intentional, some not. If you use this Index and are unable to find something, please inform the indexer at [<charliecook29150@aim.com>](mailto:charliecook29150@aim.com) so that any missing topic will be available in the next version submitted to the Fibonacci Home Page. Note that some duplication of entries exists.

Year references for each volume are as follows with the number of issues in parentheses.

Vol: 1: 1963 (4)	Vol: 2: 1964 (4)	Vol 3: 1965 (4)	Vol: 4: 1966 (4)

## SUBJECT INDEX

### Fibonacci-G

#### group topics

- Fibonacci (numbers and)
  - algebra 32.5(441)
  - group length PIX(69) PXI(95)
  - circularly generated Abelian 6.1(36)
  - group mod  $p$  10.4(345)
- groups
  - cyclic PIV(63)
  - dihedral PIX(69)
  - Fibonacci-like 15.1(35)
  - free 18.3(268)
  - generalized Fibonacci numbers in finite groups 36.3(216)
  - induced 19.3(264)
  - Lie PIII(27)
  - modular group of quadratic fields 42.1(20)
  - order of a group 16.5(403)
  - period of a Fibonacci sequence in a finite Abelian 24.4(356)
  - presentations PII(45)
  - pseudo 16.5(435)
  - subgroup and invertible classes mod  $n$  PXV(265)
  - symmetric 10.4(365)
  - 2-generated with Fibonacci length PIII(27)
  - upper triangle 14.3(201)
- hyperbolic geometry PIII(27)
- problems in the Fibonacci group PV(393)
- Q-matrix as a counterexample 5.1(44)
- three dimensional topology PIII(27)
- trees 17.2(178)
- varieties 42.3(256) PV(393)
- k-bonacci numbers in
  - finite groups 30.2(116)
  - semi groups 35.4(335)
- k-generated Fibonacci polynomials 59.4(298)

### Fibonacci-H

#### historical/biographical topics

- mathematical and related
  - Fibonacci numbers (and)
    - appearance 1.4(41)
    - color wheel PXI(39)
    - history of 2.2(149)
  - Fibonacci star 2.3(161)

#### miscellaneous

- Chines rings puzzle 55.1(2)
- Fibonacci (Leonardo Pisano) 1.4(15) 11.1(99) 24.1(70) 29.2(103)
- Fibonacci in music PXIII(127)

squares 10.1(103)

generalized Fibonacci numbers 7.5(494) 18.4(290)

higher order Fibonacci numbers 10.1(43) 10.1(71)

partitions of Fibonacci numbers 6.1(22) 18.3(220)

Fibonacci combinatorics 29.2(124)

Fibonacci for Pascal triangle sequences 42.1(38)

greedy and lazy Fibonacci expansions 43.1(60)

integers having prime  $p$  number of Fibonacci representations 40.3(260)

lexicographic ordering of Fibonacci representations 20.3(193)

maximum and/or minimum number using Fibonacci numbers 1.4(72) 2.2(114) 8.3(242) 11.3(317)  
15.3(237)

multinacci numbers 20.3(193)

smallest integer having  $F_k$  representations PVIII(47)

Wythoff numbers and Fibonacci representations 23.4(308)

## SUBJECT INDEX

### **Fibonacci-I**

integers sets and

- Fibonacci numbers (and)
  - combinatorics 12.2(141)
  - Diophantine equations PIII(197)
    - multi sets 29.2(108)
  - partitions 6.4(235)
  - Wythoff pairs 23.4(308)
- Fibonacci sets and their duals 26.2(152)

integral representation of 53.4(313)

### **Fibonacci-J**

-Jacobsthal number convolution identities 54.4(335) 56.3(237)

-Jacobsthal relationship 57.2(99,139)

### **Fibonacci-L**

last digits and Tribonacci, pentanacci and hexanacci numbers 2.4(261)

lattice topics

- Fibonacci number 13.3(215) 28.1(72) 23.3(232) 41.3(279)
- paths (and, in, on) (Note that some paths not related to lattices)
  - constructing Fibonacci ratios PVII(239)
  - Fibonacci digraphs 45.1(39)
  - Fibonacci numbers 2.1(13) 3.2(143) 8.2(185) 12.4(336) 41.3(263)

least common multiple (lcm) (and)

- Fibonacci identities 5.1(99) 33.3(211)

Leonardo of Pisa (Fibonacci) 1.1(57) 1.4(15) 11.1(99) 11.3(284) 29.2(103) 42.1(82)

PIX(xxix)

-Like numbers and congruences 53.4(335)

-Like numbers and periodic topics 53.4(335)

### **Fibonacci-M**

magic squares

- Fibonacci 2.3(216) 3.2(146) 6.1(77) 6.4(299) 48.4(2010)
- Freitag Fibonacci 6.1(77) 50.2(119)
- general 48.4(298)

matrix topics

- Fibonacci (and)
  - alternate Fibonacci numbers MRFS(114)
  - Cholesky factorization 40.3(203)
  - circulant 44.1(59)
  - congruences 41.1(48)
  - determinants 45.1(39)
  - equation 23.3(258)
  - factorization 41.1(13)
  - functions of permanents 7.5(539)
  - generalized 9.3(264) 30.3(225)
  - generalized Fibonacci numbers 16.5(447) 40.2(106)
  - ideal lattices 41.3(279)
  - in a modular group 42.1(20)
  - jacket PXIII(335)

## SUBJECT INDEX

## SUBJECT INDEX

### Fibonacci-P

#### prime number topics

- Fibonacci numbers (and)
  - primitive roots of primes 10.2(163)
- generalized Fibonacci recurrence with two variables 13.2(107)
- greatest prime factor of a Fibonacci number 48.4(358) PXIII(139)
- group theory topics PXVII(192)
- in generalized sequences 53.1(2)
- least integer having  $p$  Fibonacci representations 40.3(260)
- non-Fibonacci numbers PXI(137)
- periods in the Fibonacci sequence 44.1(59) 46/47.1(68)
- prime factorization of a Fibonacci number PXV(5)
- primes and pseudo primes and Fibonacci numbers 8.1(49)
- rank of apparition in the Fibonacci sequence 15.4(346,347)
- residues of Fibonacci numbers mod  $p$  PXI(77)
- sum and difference of two Fibonacci numbers 2.4(317)
- tests for primality of Fibonacci numbers 26.4(296) 33.3(258) 36.3(222)

#### probability topics

- Benford's Law and Fibonacci numbers 11.5(490) 14.1(13) 22.2(105)
  - Bernoulli experiments and Fibonacci-like polynomials 23.2(100)
  - Bernoulli experiments and Fibonacci numbers 17.1(23)
  - bivariate distribution 41.4(290)
  - coefficients in a Fibonacci power sum 42.3(202)
  - coin tossing 11.5(517) 16.6(539) 21.4(242)
  - digits 34.4(325,349) 36.4(305) PXIV(25)
  - experiments with random Fibonacci sequences 33.2(164)
  - Ferguson's Fibonacci formula 42.3(266)
  - Fibonacci (and)
    - fractals PVII(221)
    - killer 32.5(389)
    - moments 49.1(76)
    - number of consecutive successes in an experiment 20.1(28)
  - numbers (and)
    - central limit theorem 33.2(147)
    - Markov chains 5.2(179) 37.1(34) 40.5(453)
    - random variation 23.2(169)
    - weighted sums 41.4(360)
  - probability function 11.5(517)
  - random walks 17.3(275)
  - trees 26.2(135) PIII(155) PVII(145)
  - Markov chains and generalized Fibonacci numbers 37.1(34) 40.5(453)
- pulsated sequences PXVI/52.5(22)

### Fibonacci-Q

#### quaternions

- Fibonacci 7.2(201) 7.3(225) 20.1(59) 46/47.4(356)
  - generalized Fibonacci 11.5(547)
- quilt sequences 55.3(252) 58.2(2020)157

## SUBJECT INDEX

### Fibonacci-R

- rank of apparition (appearance, entry point, order of appearance) (and, for, in)
  - Fibonacci quotients 56.1(43)
  - Fibonacci sequence
    - basics and properties 1.2(37) 32.2(155)
    - connection with Lucas sequence 15.4(346)
    - equal periods for different moduli 16.1(86)
    - fixed points 50.4(346)
    - generalized and
      - mod  $p$  38.3(272) 56.2(113)
      - splitting fields 13.3(240)
    - powers of Fibonacci numbers 50.3( 239)
    - primitive roots 15.4(347)
    - products of consecutive Fibonacci numbers 50.2(132)
    - pseudo-primes and various parameters PVIII(259)
    - upper bounds for in the Fibonacci sequence 51.3(233)
- ratios (of, involving)
  - Farey sequences of Fibonacci numbers 13.1(1,31) 13.3(255) 14.5(389)
  - Fibonacci numbers 2.4(269) 5.1(99) 13.4(322) 15.2(113) 19.1(1) 26.3(247) PVIII(251)
  - $(F_n)^2/d$  27.3(276)
  - Fibonacci and Lucas numbers 2.4(269) 5.1(99)
  - generalized Fibonacci numbers 25.2(137) PVII(239)
  - generalized Fibonacci and sums of the form  $\sum F_k/10^{k+1}$  25.1(72)
  - 1/89 model and Fibonacci number variations 23.1(29) 27.5(448) 31.4(346) MRFS(78)
  - quadratic Fibonacci 9.4(427)
  - quadratic Fibonacci and Lucas numbers 9.4(427)
  - summation model:  $\sum F_k / 10^{k+1}$  and variations 25.1(72) 25.2(163) PV(69)
  - Zeckendorf representation of  $F_{mn} / F_n$  PV(217)
- reciprocal (sums of)
  - catalog of Fibonacci and Lucas sums 24.4(316)
  - Fibonacci reciprocal sums of
    - $F_n$  7.2(143) 9.5(449) 15.1(46,67) 30.2(179) 31.3(246) 46/47.2(153)
    - $\lfloor (F_n)^2 \rfloor$  PVI(355)
    - $F_{2n}$  10.2(199) 15.4(293)
    - $(F_{2n})^2$  15.4(293) 24.4(316) 39.3(214)
    - $F_2^n$  12.4(346) 14.3(272) 14.5(453) 15.1(67) 17.2(147) PVII(197)
    - $F_2^n_k$  14.5(453) 17.2(147)
    - $F_{an+b} + c$  19.1(14) 22.3(261)
    - $F_{an+b} + F_k$  19.1(14)
    - $F_{(2n+1)r+k} + F_r$  22.3(261)
    - $F_{(2n+1)} + L_k/\sqrt{5}$  29.3(200)
    - $F_{n+1}/F_n$  31.3(246)
    - finite sums 46/47.2(167)

## SUBJECT INDEX

### Fibonacci-R

- reciprocal (sums of)
  - Fibonacci reciprocal sums of
    - products 7.2(143) 7.2(211) 9.4(402) 9.5(449) 28.3(223) 33.3(194) 41.1(59) 53.4(323) PIII(277)
    - various powers with various subscripts 32.1(18)
    - Various ratios 46/47.2(153) PVI(355)
  - generalized Fibonacci (various notations use; all are “ $\omega$ ” here)
    - $\omega_n$  9.3(299) PXIV(171)
    - $\omega_{n+3}$  1.4(30)
    - $\omega_{2n}$  9.3(299) PXIV(171)
    - finite sums 41.2(152)
    - generating functions 9.3(299)
    - products 9.5(449) 28.3(223) 32.3(284) 35.1(68) 38.4(294) 39.3(214,264) 42.1(66) PXIV(171)
- recurrence relation (general) PXX(143)
- recurrence relations for Fibonacci numbers and linear palindromic compositions 55.1(54)
- 2<sup>nd</sup> order non-homogeneous 62.4(282)
- 2<sup>nd</sup> order with polynomial coefficients 62.4(282)
- recursion with polynomial coefficients PXIX(190)
- residue sets of Fibonacci numbers mod  $p$  60.1(48)
- roots
  - characteristic equation of  $\infty$ -generalized Fibonacci sequences 42.4(361)
  - characteristic equation of  $n^{\text{th}}$  order Fibonacci sequences PV(143) PVIII(165)
  - denominators of generating function of Fibonacci numbers 21.1(13)
  - equations with  $F_n$  as a product of a prime and a square 21.4(266)
  - Fibonacci characteristic equation 2.1(67)
  - Fibonacci polynomials 11.3(271) 13.4(312) 35.2(160)
  - polynomials with Fibonacci coefficients 21.1(62)
  - quadratic equations with Fibonacci coefficients 29.4(343)
  - sums of powers of roots of Fibonacci characteristic equations 8.2(221)
  - trigonometric for polynomials Fibonacci 20.3(219) 28.2(175)

### Fibonacci-S

- Schreier sequences 58.3(249)
- semi-sequences 58.3(231)
- sequence and non-defective numbers 55.3(209)
- sequence and partial sums 59.2(132)
- and the Hurwitz-zeta function PXX(355)
- sequence and the partial sum operator 59.2(152)
- sequence ( bi-periodic incomplete) PXX(39)
- sequence (generalized) and the Girard-Waring formula PXIX(229)
- shift formulas 11.5(523)
- shift function PXVI/52.5(168) PXX(299)
- Skiponacci sequences 59.4(327)
- special bonus issues of *The Fibonacci Quarterly* (Hoggatt Memorial Issue) 27.3
- square Fibonacci numbers as c-finite nrs PXX(143)
- staircases 53.1(61)
- subprime sequences 54.1(55) 55.4(327)

## SUBJECT INDEX

### Fibonacci-S

summation identities involving products of harmonic and Fibonacci numbers 59.3(214)

sums

and Brousseau's problem PXIX(190)

general 62.1(29,34,40, binomial:45,75) 62.2(130),147

of products of reciprocals 54.3(24-87-252; listed as 196-203)

of products of Fibonacci and Tribonacci numbers 56.3(263)

of reciprocals of Fibonacci numbers PXX(111)

  sequence PVI(473)

### Lucas-E

equations 2.2(109)  
equations  
  generalized Lucas  $v_n = v_q x^2$ ,  $q$  even 30.2(133)

## SUBJECT INDEX

### Lucas-E

- equations
  - higher order 2.1(15)
  - linear 2.1(15)
  - $L_n =$ 
    - $x^2$  2.2(109) 28.4(306)
    - $2x^2$  2.2(109) 28.4(306)
    - $Cx^2$ ,  $C < 1000$  28.4(306)
    - $px^2$  28.4(306)
  - quadratic 2.1(15)
- Euler totient ( $\phi$  function) and Lucas sequences 52.1(3)
- expansion of functions (for, in terms of)
  - Lucas 3.2(101) 14.1(83)
  - Lucas reciprocals 15.4(293)

### Lucas-F

- factorization
  - complex Lucas numbers 41.1(13)
- Fibonacci-Lucas topics (See in the Fibonacci File)
- fixed point theorems for generalized Lucas sequences mod  $m$  58.1(2020)55
- functions
  - arithmetic 37.3(265) 38.1(49)
  - arithmetic functions for Lucas representations of  $n$  11.4(337)
  - number of seating patterns 33.4(368)
  - Bessel and Lucas numbers 3.2(101)
  - Chebyshev polynomials and Lucas numbers 23.1(57)
  - hyperbolic 3.2(101) 23.1(57) PVII(393)
  - hypergeometric of Lucas numbers 43.3(213)
- Lucas
  - incomplete number sequence 42.2(106)
  - multisection 12.2(179)
  - numbers 5.5(445) 9.2(121) 41.1(72) MRFS(61)
  - q-analogue of incomplete Lucas polynomials 45.1(26)
  - ordinary: powers of Lucas numbers 5.5(445) 6.2(176)
  - zeta 46/47.3(268) 39.5(409) 48.1(47)

### Lucas-G

- generating functions
  - exponential 11.3(275) 13.2(111) 16.2(121) 26.2(115) 27.5(424) MRFS(61)
  - generalized (ordinary) 38.2(145) 42.2(106)
  - ordinary 10.6(571) 15.2(131) 27.2(169) 28.3(194) 38.2(165) 41.2(144) 56.3(237)
- graphs (and)
  - complexity 16.1(1) 18.3(229)
  - Hosoya's index for a graph 55.4(340)
  - Lucas cubes 39.1(12)
  - spanning sub graph 23.4(330)
  - spanning trees 15.1(11) 18.3(229)
- greatest common divisor (GCD) (and)
  - Lucas number sequences 29.1(24)

## SUBJECT INDEX

### Lucas-G

- greatest common divisor (GCD) (and)
  - Lucas numbers 43.1(3)
  - sums of squares of consecutive Lucas numbers PXX(255)
- group topics
  - cyclic sub and Lucas numbers 40.5(460)
  - Lucas numbers and circularly generated Abelian 6.1(36)
  - Lucas numbers and elliptic curve groups PXIII(301)

### Lucas-I

- identities (and, involving)
  - alpha 34.5(423) 35.3(230)
  - arctangent 1.4(65) 52.2(129)

    - number of summands in a representation of  $n$  49.2(116) PXII(317)
    - one-free representations 21.1(53)
    - partitions 29.2(120) 34.4(306) 60.2(111)
    - Pell numbers PV(305)
    - quasi-Zeckendorf representation 50.2(106)
    - $r$ -Zeckendorf 33.3(208)
    - representations (and, using)
      - fibbinary nrs 52.1(61)
      - $r$ -Zeck 33.3(208)
      - Wythoff representations PVI(321)
    - sums of digits 58.3(203)
    - take away games 8.3(225)
    - theorem and complete sequences PXIX(77)
    - theorem with variations of subscripts 59.4(327)
    - triple MRFS(145)
    - two-player game 58.2(2020)157
    - uniqueness 2.3(163)
    - Wythoff pairs 16.2(147) 30.3(199) 32.3(240)
    - zero-one representations 48.2(168)
  - Zeilberger procedure 60.3(267)
  - zeta series 43.1(3)
  - zigzag Hasse diagrams 1.3(43)
