

**ERRATA**  
**A COMBINATORIAL APPROACH TO FIBONOMIAL COEFFICIENTS**

ARTHUR T. BENJAMIN AND SEAN S. PLOTT

The Fibonacci Quarterly **46/47.1** (2008/2009), 7–9.

The formula for  $\binom{n}{k}_F$  should be multiplied by a factor of  $F_{n-x_k}$ , which accounts for the one remaining tiling that follows the  $f_0$  tiling. Likewise, the formula for  $\binom{n}{k}_U$  should be multiplied by  $U_{n-x_k}$ .

Thanks to Andrzej Krzysztof Kwasniewski for bringing this to our attention.
